

AMENDMENTS TO THE CLAIMS

1. (Original) A polymer alloy formed by containing 40 to 90 wt% of a nitrile group-containing copolymer rubber (A) and 10 to 60 wt% of an acrylic resin (B), wherein said acrylic resin (B) contains at least 50 wt% of (meth)acrylic ester monomer unit and 1 to 27 wt% of α,β -ethylenically unsaturated nitrile monomer unit.

2. (Original) The polymer alloy as set forth in claim 1, wherein an amount of the α,β -ethylenically unsaturated nitrile monomer unit in the acrylic resin (B) is 1.5 to 20 wt%.

3. (Original) The polymer alloy as set forth in claim 1 or 2, wherein the α,β -ethylenically unsaturated nitrile monomer unit is a (meth)acrylonitrile unit.

4. (Currently amended) The polymer alloy as set forth in ~~any one of claims 1 to 3~~ claim 1 further containing an ester compound of a compound (a) expressed by a general formula 1 below and alcohol (b) having ether bonds in its molecules.

General Formula 1: HOOCRCOOH ("R" in the formula indicates an alkylene group having a carbon number of 2 to 10.)

5. (Currently amended) The polymer alloy as set forth in ~~any one of claims 1 to 4,~~ claim 1, further containing a cross-linking agent.

6. (Original) A cross-linking material formed by performing cross-linking on the

Docket No.: 2593-0152PUS1

polymer alloy as set forth in claim 5.

7. (Original) A fuel hose made by the cross-linking material as set forth in claim 6.
8. (Original) The fuel hose as set forth in claim 7 used for vehicles.
